The Stronger and Lighter a Pulley—the More Profitable Its Operation

Strength and lightness are only two of many features that have built up such a demand for "American" Steel Split Pulleys—that over 3,000,000 have been sold in the past twenty years.

"AMERICAN" Steel Split Pulleys are simply and durably made of high quality pressed steel.

They are easy to install without using keyways or set screws, except where unusually heavy duty is required.

The strongly braced arms are flat, offering least air resistance.

AMERICAN STEEL SPLIT PULLEY

Over 60,000 pulleys, 3" to 120" in diameter, stocked at centers named below. Thousands of others carried by over 200 dealers. Write for prices and delivery dates

PATENT RAW HIDE LEATHER

OF ALL DESCRIPTIONS

Belting, Lace and Picker Leather, Strapping, Loom Pickers, Worsted Aprons

A New Departure from Old Modes and Methods

Coupe's Patent Excelsior Raw Hide Belting

This Belting is made from an article of leather that has been expressly prepared for the work it has to perform. It is not made by the old process of tanning, but by a new method which gives it greater durability, greater strength and greater adhesive quality than any leather prepared by the old method of tanning. The merits of the belt made from this class of material is as follows:

It will last longer, stretch less, run straighter and transmit more power than belts made from leather prepared by the old methods of tanning. It is the best known belt to run at a high rate of speed.

On account of the great adhesive quality of the belt it can be run much slacker; on this account brings much less friction on the bearings, thereby saving a large amount of power

REASONS WHY IT WILL DO WHAT IS CLAIMED ABOVE

It will last longer than belts made from ordinary oak tanned leather, because it has a central rigid Rawhide Stratum, the fibre of which has not been impaired by being filled up with tannic acid, but remains raw, thereby retaining the full strength of the natural hide.

It will stretch less than oak belting, owing to the rigidity of the Central Rawhide Stratum.

It will run straighter than oak belting, because of its less liability to stretch.

It will transmit more power than oak belting, because it has a compact, soft, pliable surface, that enables it to hug and readily accommodate itself to the pulley.

It is better adapted to run at a high rate of speed than oak belting, on account of its great adhesive quality, which prevents slipping.

All the above points are worthy of consideration by consumers of belting; as belting is a very expensive article about a large manufacturing plant, it is wise and economical to procure the best, even though the first cost is a little higher.

Now, what is the Best belt? The Best Belt is that which will last the longest, stretch the least, run the straightest, and transmit the most power. We claim all this for the Excelsior Raw Hide Belting.

Testimonials can be furnished if required.

A PLAIN STATEMENT OF THE CASE

Why is it that many manufacturers of the Chemical Imitation Leather, fraudulently called Raw Hide, are complaining so bitterly about losing their trade? The fact is, their process is at fault; it will not produce a good article of leather; and, in order to sell their leather at a low price, they have made it so poor that many consumers have become disgusted with it, and have been compelled to look for various substitutes for fastening their belts; hence their loss of trade. The best is none too good.

The above is not the story told of the genuine

Excelsior Raw Hide Lace Leather

The demand for it is constantly increasing, and it still retains its long-standing reputation; it is still, as one of our old customers who has sold thousands of sides of it, said of it years ago:

"The nearest approach to a perfect lace yet seen"

WORKS OF WM. COUPE (LTD.), SOUTH ATTLEBORO, MASS.

A trial will convince any consumer of its superior merits. It is the only Lace Leather on the market that will successfully stand the extremes of climatic temperatures; it is not affected either by heat or cold. The reason is because it contains no materials that are in any way injurious to the fibre or gelatine of the hide as in the imitation.

OUR MOTTO IS, NOT HOW CHEAP WE CAN MAKE IT, BUT HOW GOOD

Ask your dealer for it—take no other represented to be as good; if he does not furnish it, send to us, and we will supply it at the dealers' price.

The illustration at the top shows various pieces of cotton spinning machinery, including large bobbins and spindles, set against a background of a cotton field and a distant mill. Below this, a large, detailed illustration of a smiling cotton picker, wearing a hat and a long-sleeved shirt, is shown carrying a large, overflowing basket of cotton bolls. The picker is positioned on the right side of the advertisement, with the cotton bolls spilling out of the basket. The entire scene is framed by a decorative border of cotton bolls and leaves.

No. 11 Mill Ludlow Manufacturing Associates
Ludlow, Massachusetts

THIS ORGANIZATION renders expert engineering service in connection with all industrial engineering problems.

Plans and specifications are prepared for the erection and complete equipment of textile mills and other industrial plants, including steam and hydraulic power plants.

The reorganization of textile and industrial plants is a highly developed function of this concern.

A wide experience in the examination and survey of water powers, power plants and manufacturing and other plants is utilized in the preparation of special reports with reference to their improvement or valuation.

CHARLES T. MAIN

Mill Engineer and Architect

Permanent Colors Create Permanent Trade

The insistent demand of the consumer for Fast Colors makes it imperative that the Retailer, the Jobber, the Cutter-up and Textile Manufacturers recognize the question, Fastness of Colors, as a most important one.

Indigo The introduction of synthetic Indigo by the Badische Anilin- & Soda-Fabrik in 1897 greatly lowered its cost, simplified its application and placed it on a scientific basis. The immediate practical result has been that Indigo is used on an ever increasing scale in the production of overall goods (denims) for working garments worn by artisans of all classes everywhere, as well as for navy blues with white designs, in percales and similar fabrics which are so largely used the world over for women's house and working dresses. Nothing has yet been found which is as well suited as Indigo for these and many other purposes, since it combines minimum cost, brilliancy of color and satisfactory fastness. In fact, the word "Indigo" to the consuming public is a guarantee of a durable and satisfactory color.

Indanthrenes Unfortunately, however, Indigo produces only a Blue, while the trade requires every shade in fast and brilliant colors. To Dr. Rene Bohn, Director of the Badische Anilin- & Soda-Fabrik, Ludwigshafen a/Rhein, should be given credit for the discovery of the series of dyestuffs derived from Anthracene, known as Indanthrene Dyes, which produce fast colors in every desired shade and tone. The introduction of these dyes in the cotton industry has created a new standard for fastness and brilliancy, in which combined respects they excel any colors heretofore known. Indanthrenes are actually permanent while the fibre lasts, meeting, therefore, every trade requirement, a fact so well demonstrated that to-day the word "Indanthrene" (pronounced In-dan-threne) is synonymous with "Fast Colors." There is probably no factor of greater importance in the manufacture of cotton goods than the fastness of the colors, in that it constitutes a most attractive selling argument, increases their popularity, and broadens the market for them.

GETTING PAID FOR THE GOODS YOU BILL

*Is the Most Important Thing
About Selling Goods*

TO get paid *promptly* for your goods—with no delays—no misunderstandings—*your billing and accounting system must be right.*

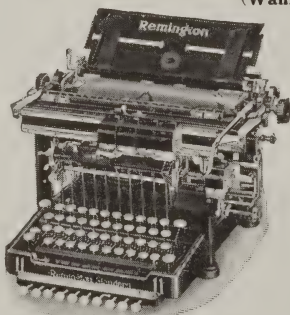

When your bill reaches your customer it must be self explanatory and self evident. *It goes alone.* No salesman goes with it to smooth out misunderstandings or errors.

What you need—what every business needs—is an *error proof billing system*—one which will insure the prompt and correct rendering of every bill and the correct entering of every charge—with a minimum of labor and expense.

We offer you the service of a machine which will “error proof” your billing and incidentally, cut to a minimum the clerical labor and the clerical cost.

The Remington Accounting Machine

(Wahl Mechanism)

is the final solution of every man's billing problem.

Write to us for a folder (W4573) which shows in facsimile exactly what the machine does. This folder will be a revelation of how to combine time saving and accuracy in billing and accounting work.

SPINNING AND TWISTING

TRAVELERS

OF EVERY DESCRIPTION

U. S. STANDARD

The finest tempered and most durable travelers that skilled workmanship and latest improved machinery can make, are our product. Uniform temper ensures even running, while poor tempering means broken travelers and cut threads. Our shipments vary not the slightest either in weight or quality from our samples.

The Basis of Quality Goods

For three-quarters of a century Cheney Silks have enjoyed a reputation for superior quality. This quality is based on superior silk yarns—yarns that are uniform in strength, evenness, elasticity, smoothness, lustre and color.

Cheney Silk Yarns

These same yarns that Cheney Brothers use to maintain the high quality standard of their own goods they sell to other manufacturers with reputations to sustain. Leading lines of hosiery, gloves, cravats, mufflers, underwear, sweaters and other lines of silk and silk-mixture goods owe much of their primacy to Cheney Silk Yarns.

CHENEY SILKS

These silks, famous for over 75 years, are the product of the largest makers of silks of all kinds in America. They include practically every variety of silk goods made for dresses, millinery, haberdasher or manufacturer, decoration or upholstery.

FOSTER CONES

are wound only on our patented
machines

The winding is distinctive in lay of yarn and angle of wind. These Foster features give an even tension from the cone, and produce a uniform stitch in the knitted fabric.

Posselt's Textile Journal

E. A. POSSELT, *Editor and Publisher*

From the standpoint of the practical information which it contains it is of value to every manufacturer, superintendent, overseer and operative, among whom it is widely circulated. It is the leading and by far the most valuable of all textile trade publications.

Special features in every issue: Discussions on Designing and Fabric Structure; Cotton, Woolen and Worsted Spinning; Silk from the Raw Fibre to the Finished Fabric; Cloth Analysis and Calculations; Dyeing and Finishing Processes; Reviews of the Market and Suggestions as to the Creation of New Styles, Color Combinations, etc.; as well as a general report on the News of the Textile Mills.

The "DICTIONARY OF TEXTILE TERMS," as appearing regularly every month, gives you the definition of every word in the Textile industry you ever will come in contact with. It is the reason why thousands of Journals are preserved for future reference, to be consulted when in need of information, nothing of its kind being published in any language.

SUBSCRIPTION, \$2.00 per year; Canada, \$2.50; Foreign, \$3.00

THE TEXTILE INDUSTRY

IN THE SOUTH IS GROWING MORE
RAPIDLY THAN IN ANY OTHER
SECTION OF THIS COUNTRY.

The Textile Manufacturer

IS LOCATED AT THE VERY CEN-
TER OF TEXTILE DEVELOPMENT
IN THE SOUTH; It Covers the South
Thoroughly, and it has been published

Ask The Man Who Pays

Ask the man who pays the bill, when he buys equipment of any kind for his mill, which publication he reads with greater care. He will tell you it is **COMMERCE AND FINANCE**, because he learns more about the cotton market from it than any other publication. He knows Theodore H. Price's cotton editorials are the most authentic published on the subject.

Cotton is **Two-Thirds** of the textile industry. It's all the cotton mill man turns into a finished product. It's a big factor both in the woolen and silk industries.

If, through the leading authority of the cotton industry, you reach the real head of the firm, isn't it the place to put your advertising?

May our representative call to explain the proposition in detail or write for full particulars.

FIBRE MATTRESS MANUFACTURERS

This list gives all makers of mattresses who use the following goods:

- | | |
|------------------|--------------|
| 1 Cotton Felt | 5 Hair |
| 2 Cotton Batting | 6 Shoddy |
| 3 Cotton Waste | 7 Jute Fibre |
| 4 Cotton Linters | 8 Kapok |

An asterisk (*) in front of the names indicates that the firm uses all the above goods.

The number after the names indicates which of the above goods they use—for instance: 1 means they use Cotton Felt; 2 Cotton Batting; 3 Cotton Waste; 4 Linters; 5 Hair; 6 Shoddy; 7 Jute Fibre; 8 Kapok.

Under the name "Mfr. Cotton Felt" means that this concern manufactures cotton felt or other goods if given. "1 P." means 1 pickers; "1 G." means 1 garnet machine.

Where no asterisk appears in front, or no numbers after a name, it indicates that we have been unable to ascertain the kind of goods used by these concerns.

This list gives only the manufacturers who use fibres; the makers of mattresses from excelsior and other stock are not included unless they are fibres.
